THE OLD COLONIAL HOME OF MRS. KOPPERL WITH ITS LUXURIANT GROWTH OF TROPICAL PALMS.
THE HOUSE DISMANTLED BY THE STORM, YET BEARING ITS FORMER BEAUTY.

Beauty, Ruin and Restoration

Galveston as it was the day before and the day after the hurricane of September 8th, 1900, is pictured in these pages. There was no more beautiful city in the South on Saturday morning. There was no more desolate city in the world on Sunday morning.

The wreckage is disappearing like ghosts of the night before a rising sun. When the new year dawns little will be left to tell the story of the greatest tragedy of the passing century, and the twentieth century will smile upon the busiest and most promising city of the continent.

Already it is assured that the site of the city will be raised 8 to 10 feet, and that a substantial sea wall will be constructed to defy the madness of the ocean. This has restored public confidence and Galveston investments are firm.

With these measures of protection, nothing will remain but a memory of the sorrowful tragedy which cost 6,000 lives in the city, 1,000 more on the island and 1,000 more on the adjacent mainland, and destroyed public and private property to the value of $30,000,000.00.

The pictures herein presented cannot be found in any other publication. The views before the storm were prepared for "Picturesque Galveston," a handsome souvenir which was in press when the hurricane came; then the publishers had views of the wreckage made. Thus the purchaser of this volume has literally a view of Galveston the day before and the day after the storm.

BURNING THE DEAD ON THE BEACH.
